Quiz 3

Due date: April 1, 2025

1. Download the binary image “Circuit Board” from the course’s web page. Perform erosion and dilation on this image using a 5x5 and a 9x9 square structuring element.
2. Perform an opening on the Circuit Board image with a 5x5 square structuring element.
3. Download the image “Leaf” from the course’s web page. Segment this image using the Otsu’s method.

Submission: please save all your images in .tif or .gif format. Compress all your images into one file named xxxxxxQ3.zip where xxxxxx is your student number and upload to the Avenue to Learn. Please do NOT email your homework to the instructor. You can submit the non-programming questions on the due date to the instructor in the class or upload them electronically along with your images to the Avenue.
